

Survey only for IGF newsletter subscribers

The GOEDE Wissenschaftsstiftung organizes a survey on gravity experiments. Predominantly we have selected the NASA BPP experiments, of the 2001 AIAA JPC Breakthrough Propulsion Physics Conference, Salt Lake City.

N O T E:

“In 2002, both the Breakthrough Propulsion Physics Project and the Revolutionary Propulsion Research Project, that were part of ASTP's "Revolutionary Research Investment Area," were removed from the ASTP. Presently there is no funding available to continue the BPP Project.”

By participating in this survey you can give us your opinion on, which experiment is promising and which experiment you believe is generally accepted.

Abstracts can be found activating the button NASA BPP

We ask you kindly to please take some minutes to answer our questions.

The results of our survey will be published on our website on 10. of January 2004.

Thank you and best regards.
